GEOCACHING

Revitalize, Reconnect, and Explore

The Pines of Kabetogama is proud to offer Geocaching for our Resort Guests. Simply put, Geocaching is a high-tech scavenger hunt using GPS enabled devices. This is a treasure hunt suitable for all ages.

Players will be given GPS coordinates and directed to hidden Geocache containers throughout the 54-acre estate. You must use the GPS coordinates to find each Geocache.

The cache is a hidden treasure in a waterproof container, along with a logbook. Upon finding a cache, you must sign your name in the logbook, return the logbook and help yourself to the treasure. Be sure to leave something behind for future geocache players.

These coveted caches are hidden along various hiking trails on the property, providing you with an opportunity to explore the vast, unspoiled Northwoods at The Pines of Kabetogama Resort.

To make the hunt even sweeter, we have one cache with a hidden treasure for you to bring to our General Store so you can exchange for a treat!

Check in with us in the office for all the rules of the game. If you don’t have GPS enabled device, we have a GPS you can check out for the game.
